Summary

Android Developer with 3 years of experience building production-grade, secure, and scalable healthcare applications using Kotlin and modern Android architecture. Experienced in offline-first systems, BLE integrations, and secure cloud-based authentication. Strong focus on performance optimization, data integrity, and end-to-end feature ownership in product-driven environments.

Experience

Startoon Labs Private Limited

April 2023 – January 2026

Software Developer

Hyderabad, Telangana

- **Architected and implemented MVVM-based modular architecture** for a production healthcare application, decoupling UI and business logic to improve maintainability, scalability, and enable structured unit testing.
- **Designed a secure authentication and encryption layer** using AWS Cognito, JWT, AES-256, and SHA algorithms, ensuring HIPAA-compliant handling of sensitive patient data across all API communications.
- **Led performance optimization initiatives** that reduced application codebase by 20%, improved load times, and decreased resource consumption, resulting in a noticeably smoother and more stable user experience.
- **Engineered an offline-first architecture** using Room + SQLCipher with AES-256 encryption, enabling uninterrupted physiotherapy session tracking in low-connectivity environments and increasing patient engagement by 35%.
- **Optimized BLE communication layer** for real-time data exchange with physiotherapy devices, improving sync reliability and ensuring consistent device-server data integrity.
- **Owned feature delivery lifecycle** from architecture design to production deployment, guiding a team of four developers and ensuring timely, high-quality releases aligned with client requirements.
- **Managed Play Store deployments** and production rollouts, monitoring release stability and ensuring compliance with Google Play policies.
- **Collaborated with cross-functional teams** including backend engineers and product stakeholders to define feature requirements and optimize API contracts.

Technical Skills

Core Languages: Java, Kotlin, JavaScript

Android Development: Android Studio, Android SDK, Jetpack Compose, MVVM, BLE, Coroutines

Backend & Cloud: AWS (Cognito, S3, EC2), Firebase, REST APIs, JWT

Databases: Room, SQLite, MySQL, SQLCipher

Tools: Git, Postman, Retrofit

Additional: React Native

Projects

Smart Fitness App | *Android, BLE, Room, Retrofit*

- Integrated Polar BLE smartwatches for real-time heart rate tracking.
- Processed live metrics such as heart rate zones and calorie analytics.
- Implemented Room database persistence and backend synchronization via REST APIs.

Book My Appointment | *Android, Firebase*

- Built cross-platform appointment booking system for medical representatives.
- Implemented real-time Firebase synchronization for slot availability.

Education

Marathwada Mitra Mandal's College of Engineering

2020 – 2023

Bachelor of Engineering in Information Technology (CGPA: 9.1/10)

Pune, Maharashtra

Latthe Education Society Polytechnic

2017 – 2020

Diploma in Computer Engineering (90.46%)

Sangli, Maharashtra

Certifications

- Android Development: MobDevOps+ Android 15

Honors & Awards

- Outstanding Contribution Award – Q3 2023
