

DOUTH SAI ROHITH

Phone: +91-7893439521; **Email:** sairohith685@gmail.com;

LinkedIn: <https://www.linkedin.com/in/sai-rohith-3b9227234/>

OBJECTIVE

Dedicated professional seeking an opportunity to maximize my potential and significantly contribute to the organization's growth through innovative solutions and collaborative teamwork.

ACADEMIC QUALIFICATION

Bachelor of Technology in Artificial Intelligence & Data Science, Vallurupalli Nageswara Rao Vignana Jyothi Institute of Engineering and Technology, Hyderabad **2021-2025**

CGPA: 8.23/10

TECHNICAL SKILLS

Languages: C, Java, Python, HTML, CSS, JavaScript.

Other Skills: SQL, Problem-Solving, Object-Oriented Programming, AWS Cloud, Machine Learning, Data Science.

WORK EXPERIENCE:

- Worked as a Research Intern at Xairo Tech PVT LTD, where worked on problem statement Robotics in Construction, learned design thinking for the marketing strategy.
- **Start date:** 25/04/2024
- **End date:** 25/06/2024

RESEARCH ACTIVITIES:

- Constructed a comprehensive dataset of 500+ MRI and PET scans, annotated with detailed clinical information, facilitating the training and validation of machine learning models for Alzheimer's diagnosis. (Ongoing Research work)

CERTIFICATIONS:

- Data Science by Bharat Intern
- Cloud Computing by NPTEL
- Intermediate Machine Learning by Coursera

ACADEMIC PROJECTS

Title: Alzheimer's Classification

Team Size: 4

Software Requirements: Python, Deep Learning, Multi-class Classification

Description:

- This Alzheimer's detection project is designed to improve early diagnosis and staging accuracy by combining advanced imaging and deep learning methods. Through the use of both MRI and amyloid PET scans, it seeks to capture subtle early indicators, particularly amyloid plaques, associated with Alzheimer's Disease onset.

Title: Campus Query Bot**Team Size:** 3**The technology used:** NLP, Machine Learning, Python**Description:**

- The core of the chatbot is its ability to recognize user intent. I used Natural Language Processing (NLP) to process and understand user inputs. Specifically, I built an intent recognition pipeline that uses TF-IDF (Term Frequency-Inverse Document Frequency).

Title: Sorting Visualizer**Team Size:** 1**The technology used:** HTML, CSS, JavaScript**Description:**

- Sorting Visualizer is a React application that visualizes the Merge Sort algorithm. The application generates an array of bars with random heights and allows users to visualize the sorting process in real-time.

Title: Diabetes Prediction using SVM**Team Size:** 1**The technology used:** Python, Supervised Machine Learning, SVM Classifier**Description:**

- Diabetes prediction using SVM concept of supervised Machine Learning, the SVM classifier's strengths in handling high- dimensional data, robustness, clear decision boundaries, and empirical success in classification tasks made it the ideal choice for this project

ACHIEVEMENTS

- Secured first place in project contest at VNRVJIET.
- Stood second position in the esteemed College Technical Fest Paper presentation competition.
- Best Academic student of the year in 10th standard.

EXTRACURRICULAR ACTIVITIES

- General Secretary at Computer Society of India, VNR VJIET, Hyderabad, 2024-Present
- Student Coordinator at VJ AI Research & Code, VNRVJIET, Hyderabad, 2024-Present
- Organized the "VJ Hackathon," a national hackathon that attracted more than 3,000 participants
- Orchestrated and facilitated the highly successful 'Sherlock-Code- Breakers' a Debugging competition, engaging 100+ participants and boosting team morale during a company-wide event.
